

**Developers of Open Database Products and Tools for Legacy Application and Data Integration.**

Recital™ Corporation provide a unique solution that includes a blend of cross-platform database development tools for legacy application and data integration, the world's first cross-platform Visual FoxPro 8.0 compatible database server, complete applications outsourcing, professional support, training, and services.

**Internet/Web enable  
Recital, Clipper,  
FoxBASE and FoxPro  
applications.**

## **Product Focus**

### **Recital 9 Visual Developer**

**Recital Visual Developer is a member of the Recital 9 product family. The Recital 9 product family is a platform, user interface and data source independent solution that defines and delivers tools and technologies for building character based, client/server and internet-based database solutions.**

Recital 9 Visual Developer is the only product for Windows, Linux, Unix, and OpenVMS that migrates FoxPro 2.6 and SCO FoxBASE applications to the internet and transforms them into GUI client/server applications without having to rewrite the code. Legacy FoxPro 2.6 and SCO FoxBASE applications can be enhanced with full Windows .NET Forms functionality. Recital 9 Visual Developer extends the life of your existing applications, providing you with a greater return on investment, without the need to rewrite the application, or retrain your developers and end-users.

# **The Recital 9 Product Family**

## **▶ Recital 9 Visual Developer**

### **KEY FEATURES AND BENEFITS**

- Leverage your existing FoxPro skills**
- Migrate your existing FoxPro, Clipper and dBase applications**
- Visual FoxPro 8.0 compatible SQL**
- ANSI SQL Compliant**
- Navigational and SQL data access**
- Visual FoxPro 8.0 compatible SQL**
- Active Data Dictionary**
- Broad cross platform support**
- Advanced security with DES3 encryption**
- Broad cross platform support**
- Integrate data from remote locations**
- High performance and scalable**
- Universal data access**
- World class customer support**
- Fully Internet enabled**
- Easy to install and administer**
- Supports XML import and export**
- Open and extensible through our C FUNCTION and OBJECT API**
- Integrated high performance data-centric object oriented 4GL**
- Very large database support**
- Local cursor engine**
- Database events**
- Built-in batch processing capabilities**
- Structured error handling**
- User interface agnostic**
- Low-level ISAM C API for high performance non-server database access**

# Recital 9 Visual Developer

## ▶ Key product features

### Product Description

Recital 9 Visual Developer is the only product for Windows, Linux, Unix, and OpenVMS that migrates FoxPro 2.6 and SCO FoxBASE applications to the internet and transforms them into GUI client/server applications without having to rewrite the code. Legacy FoxPro 2.6 and SCO FoxBASE applications can be enhanced with full Windows .NET Forms functionality. Recital 9 Visual Developer extends the life of your existing applications, providing you with a greater return on investment, without the need to rewrite the application, or retrain your developers and end-users. Recital 9 Visual Developer is comprised of the following products.

- **Recital Visual Developer**
- **Recital Mirage .NET Client**
- **Recital Mirage .NET WebClient**
- **Recital Mirage Java Client**
- **Recital Mirage Java WebClient**
- **Recital Mirage Application Server**

### Key Features

Migrates existing Recital, FoxPro 2.6 and SCO FoxBASE applications into a web-based or GUI environment

Automatically transform existing character mode screens using XML templates without making source code modifications

Interactive "Command" panel for interacting with the Mirage Application Server at development time

Keep a history of code changes using revision lists

Client/Server Integrated Development Environment for developing Web, Windows and terminal user interfaces

Works with Windows, Linux, Unix and OpenVMS Mirage Application Servers — across the Internet

Run applications graphically under the Mirage .NET Client or character-mode under the embedded Telnet Client

Project Manager to organize and manage all files in a project

Team development features with file versioning and synchronization conflict management

Automatic synchronization of modified files with the Mirage Application Server

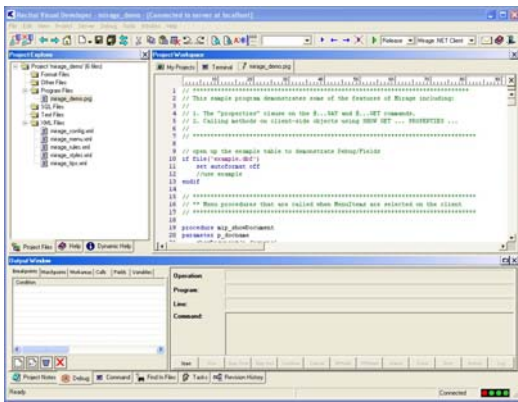

Keep a history of code changes using revision lists

IntelliHelp technology to decrease coding time by using powerful, extensible language assistance as you type including automatic statement completion

Graphical program debugger supporting breakpoints, variable watchpoints, execution history tracing, call stacktrace, and dynamic views of variables and database tables during program execution

Fully integrated and extensive reference documentation

Manage "Things to do" using task lists

### System Requirements

#### Recital 9 Visual Developer

Windows 95/98/ME/NT/2000/XP/2003

Requires the Microsoft .NET 1.1 framework

Requires the Microsoft Visual J# 1.1 Redistributable package

#### Recital 9 Mirage Client Driver

Windows 95/98/ME/NT/2000/XP/2003

Mirage .NET Client requires the Microsoft .NET 1.1 framework

Mirage .NET Client requires the Microsoft Visual J# 1.1 Redistributable package

Mirage .NET Client requires the Microsoft Visual J# browser controls v1.1b and above

Mirage Java Client requires the Microsoft JVM or the Sun JVM

#### Recital 9 Mirage Application Server

Windows 95/98/ME/NT/2000/XP/2003

IBM AIX® 4.3 and above

HP-UX® 10.20 and above

Sun® Solaris™ SPARC 2.7 and above

SCO UnixWare 7.1 and above

SCO OpenServer 5.0.5 and above

Compaq Alpha OpenVMS 7.2-1 and above

Intel Linux Redhat 7.2 and above

Linux Large File Support requires glibc >= 2.2 and an ext2 file system

Windows Large File Support requires Windows/XP and above
